## Key Topics of Interest

- ✓ Lifecycle uses of synthetic data, including LLM-driven generation and evaluation
- ✓ Privacy, security, and data governance (e.g., PETs, leakage risks, provenance)
- ✓ Fairness, bias, and representation in real/synthetic data mixes
- ✓ Safety, robustness, and red-teaming with synthetic data
- ✓ Explainability, interpretability, and uncertainty estimation
- ✓ Standards, metrics, and tooling for trustworthy synthetic data use
- ✓ Critical perspectives from law, policy, ethics, and social sciences
